

Distinguished Speaker Series

Monday, September 24, 2018

Blue Bell Country Club

Normandy Farms, Blue Bell, PA

Dr. Daniel Kubikian

Presents

Anterior Implant Esthetics and Complications

Anterior implant placement and restoration can be a challenge. A number of variables will be addressed in an effort to increase predictability and success!

Dr. Kubikian is board certified as a Diplomate of the American Board of Periodontology and is an Assistant Clinical Professor in Department of Periodontics at The University of Pennsylvania. He is a featured lecturer in implant dentistry at The University of Pennsylvania and Albert Einstein Medical Center. He has lectured at the Greater New York Dental Meeting and at various meetings throughout the east coast.

Cocktails - 6 PM • Dinner - 7 PM
Meeting - 8 PM

See page 15 for Registration form.

President's Message

David M. Kaffey, DDS

Autumn is just around the corner. For many, September represents the end of the lazy days of summer and signals the start of perhaps a more productive and busy time of the year. It is interesting to note that "September" comes from the Latin root *septem* which means "seven". But why would our 9th month of the year mean "7"? The original Roman calendar only had 10 months - Martius, Aprilis, Maius, Junius, Quintilis, Sextilis, September, October, November, and December. It wasn't until much later that Julius Caesar expanded and changed the calendar to include 12 months by adding January and February. Do you know which months were renamed in honor of Julius and Augustus Caesar? (I didn't say which months were named after them. I said which months were **re-named**. I bet you had to look at the list again.)

As the leaves begin to change colors and the squirrels start their winter gathering, know that your Executive Board has been very busy as well. While many people relax and take it easy during the summer months, your Board has been working hard to develop programming and benefits to meet your needs.

It is with great honor and humility that I begin my Presidency. For the past 90 years, our organization has been blessed with outstanding leaders who were and continue to be passionate about dentistry and providing for our members. I will do my best to continue this Legacy of Excellence.

As an organization that represents your wants and needs, we have a full calendar of events planned for 2018-2019. We truly hope you will take advantage of all the programming we have put together. Our Distinguished Speakers Series, held on Monday evenings 6-9pm at Normandy Farms in Blue Bell, will feature Dr. Daniel Kubiakan (9/24/18, *Perio-Prosthetic Connections*), Dr. Neil Mushlin (10/29/18, *pulmonologist board certified in Sleep Medicine, obstructive sleep apnea from a medical perspective*), and Dr. Julian Conejo (2/25/19, *dental materials and minimally invasive reconstruction procedures*). Several social events will include an **Escape the Room Adventure** and a **tasting of wines from around the world dinner**. We will have 2 shredding events this year. One in the Fall, one in the Spring. Our all day CE program series, held at Blue Bell Country Club, will include presentations on implants, cosmetics, pharmacology, 3 D printing, minimal preparations, digital work flow, and esthetic zone considerations.

Final Ruling for EPA Regulations in Dental Offices for Handling Amalgam

"The members of the Montgomery Bucks Dental Society are on the forefront of patient care and community service. As such, we are always searching for products and services to support our goals and keep the costs of healthcare delivery at reasonable levels. We are proud to partner with Solmetex, a leader in waste amalgam separation and recovery, to offer our membership an exclusive cost savings opportunity. It is an honor for us to be working with them."

David M. Kaffey, DDS, President, Montgomery Bucks Dental Society

The Summary:

The Environmental Protection Agency has set standards for the disposal of dental amalgam waste, in order to support the Clean Water Act. Since the ruling passed in July 2017, dentists are now required to use amalgam separators, which essentially are solid collectors that are installed on vacuum lines, designed to capture all waste before it reaches the sewer lines and water treatment facility. Dental offices are no longer be able to send amalgam down the drain in their practice.

This ruling affects most dental practices (exemptions are present) and the purpose of this ruling is to reduce the amount of mercury that ends up in the sewer system. The EPA has stated that this new ruling will cut mercury discharge by 5.1 tons. Additionally, mercury is not the only element that is in amalgam, as there are several other harmful metals collected as well. The EPA predicts that the regulations will help reduce the waste of these additional metals by 5.3 tons. Gary L. Roberts, the president of the American Dental Association stated that he agrees with the new ruling and that the new ruling is better than having regulations that can vary from state to state, which was the case, prior to July 14, 2017.

The Important Dates:

The EPA "Dental Rule" requires new practices to install an amalgam separator within 90 days; existing dental practices have until July 14, 2020 to install; and practices that already have an amalgam separator installed have until July 14, 2027 to install an ISO 11143:2008 certified amalgam separator.

Solmetex:

Contrary to popular belief, amalgam separators are easy to install while some models can be installed in a few hours and require minimal yearly maintenance. The only thing that will have to be done is replace the container once it is full. The collection container will typically need to be replaced every 6 to 12 months, depending on the number of chairs that feed into the system, the size of the practice and the number of patients having their old mercury based fillings removed.

The NXT Hg5 series of Amalgam Separators meet or exceed all requirements of the EPA regulation. The NXT Hg5 comes in 3 sizes to fit your dental practice; the NXT Hg5 standard is suitable for 1-10 operatories; the NXT Hg5 mini is designed for tight spaces (such as under a sink) and is suitable for 1-4 operatories and the NXT Hg5 High Volume is suitable for larger practices, 11-20 operatories. In addition to recycling of wet amalgam waste with an amalgam separator, Solmetex offers its Practice Waste Solutions amalgam buckets (4 sizes available) that is also now required by the EPA to collect and recycle 'dry' amalgam waste. Examples of 'dry' amalgam waste include: chair-side traps, vacuum filters, teeth with amalgam, contact & non-contact amalgam and amalgam capsules. All Solmetex products include certificates of compliance 24/7 on www.solmetex.com as well as online chat and customer service support.

GREATER PHILADELPHIA VALLEY FORGE DENTAL CONFERENCE®

MARCH 6-7-8, 2019 • VALLEY FORGE CASINO RESORT & CONVENTION CENTER

WEDNESDAY, MARCH 6, 2019

Dr. Mary Beth Dunn - ABC's of Pediatric Dentistry
Dr. Mark Kleive - (PM) Composite Restoration Workshop
Dr. George Merijohn - (AM) Instrument Sharpening Workshop; (PM) Lecture - Gingival Recessions
Dr. Susan Muller - (AM) Red, White & Ulcerative Lesions (PM) Oral Pathology Update
Pam Smith, RDH - (AM) Eat, Live, & Age Well (PM) Winning the War Against Inflammation

CHILD ABUSE RECOGNITION & REPORTING - (Wednesday Evening Only)

THURSDAY, MARCH 7, 2019

Lillian Caperila, RDH - The Changing Face of Dental Hygiene
Debra Engelhardt-Nash - Creating a Powerful Practice
Dr. Mark Kleive - (AM) Artistry with Composite Restorations (PM) Efficient Veneer Planning
Dr. George Merijohn - (AM) Hands-on KIWI Method (Periodontal Grafting)

Reminders:

- AGD, CERP & PDHA Accredited Courses
- 66 Exhibiting Companies
- *All Second District Members receive Free CE Credits when registered before February 11, 2019 and following payment of their 2019 PDA/ADA dues (Workshops & Child Abuse Course Exempt)
- *FREEDOM PASS available for Dentists who practice outside of Second District: Purchase two full days of courses and receive a FREE NIGHT at the VF Radisson Hotel plus 2 luncheon vouchers, \$625/person.

FRIDAY, MARCH 8, 2019

Debra Engelhardt-Nash - (AM) Communications & Customer Service
Dr. John Molinari - Infection Control & OSHA Update
Dr. Steve Rasner - (New Dentist Program) - Blueprint for A Successful Practice

PERIO SYMPOSIUM:

Facilitator - Dr. Joseph Greenberg

- (AM) **Dr. Thomas Rams** - Periodontal Monitoring
- (AM) **Dr. Edward Marcus** - Lasers In Periodontics
- (PM) **Dr. I. Stephen Brown** - The Pinhole Surgical Technique
- (PM) **Dr. Nipul Tanna** - Advances in Perio-Ortho Treatment

Continuing Education 2018-2019 - See Page 14 for registration.

Seminar #1, Friday, September 28, 2018

Level: For Entire Team/New Dentists

AM: Dr. Paul Goodman - *"Dental Implants: The Expanding Role of the General Dentist"*

PM: Dr. Todd Fleischman - *"Cosmetically Driven, Functionally Satisfying—Refined Restorative Techniques for Predictable Outcomes"*

ABOUT THIS AM COURSE:

DENTAL IMPLANTS: THE EXPANDING ROLE OF THE GENERAL DENTIST

Implant dentistry provides an opportunity to offer patients increased self-esteem, enhanced chewing capabilities and optimal treatment while boosting practice revenue. Help patients see the value in implants and get them to say

"Yes!" to reach your practice's full implant potential.

COURSE OBJECTIVES:

- Learn a streamlined process through his PPRMP Method: Planning, Placement, Restoration, Maintenance and Profit
- Learn a decision making protocol for predictable implant restorations
- Explore a simple 15-minute "missing tooth consultation"
- Learn techniques to work harmoniously with your surgical specialist

DR. PAUL GOODMAN received advanced training and also placed and restored 150 dental implants during his general practice residency and hospital fellowship at Albert Einstein Medical Center. He has been a faculty member for Hiossen Dental Implant Training Program for the past 10 years and has helped over 100 general dentists place their first dental implants. He teaches dental residents at Albert Einstein Medical Center lecturing to dentists on placing and restoring implants. A graduate of the University of Pennsylvania School of Dental Medicine, Dr. Goodman has been practicing dentistry for over 10 years and works with his brother in two locations in Mercer County, NJ.

ABOUT THIS PM COURSE:

COSMETICALLY DRIVEN, FUNCTIONALLY SATISFYING—REFINED RESTORATIVE TECHNIQUES FOR PREDICTABLE OUTCOMES

During this presentation, attendees will learn how to communicate cosmetic dental care, while considering occlusal theory, in developing predictable treatment plans for motivated patients. Two specific start to finish, before and after clinical cases will be comprehensively reviewed.

COURSE OBJECTIVES:

- Show the benefits of dental photography for patient education
- Review occlusal considerations in case development
- Discuss material choices in strength and esthetic decision making
- Evaluate treatment limitations and barriers to case success
- Celebrate restorative outcomes by eliminating compromise of clinical timing or technique

DR. TODD FLEISCHMAN received his undergraduate education in psychology from New York University and then graduated from Temple University School of Dentistry with his doctoral degree. He completed his post-graduate Advanced Education in General Dentistry residency with the University of Medicine and Dentistry of New Jersey. He is an advocate for continuing education and is an avid student of SPEAR Education in Scottsdale, Arizona, and the KOIS Center in Seattle, Washington—two of the country's most respected and comprehensive dental curriculum programs. Since September of 2010 he has run a cosmetic and comprehensive care, fee-for-service practice in Center City Philadelphia.

Seminar #2, Friday, November 16, 2018

Level: For Entire Team/New Dentists

Dr. Rick Ferguson - AM: *"Implants in the Esthetic Zone"* PM: *"Affordable 3D Printing"*

ABOUT THIS AM COURSE:

IMPLANTS IN THE ESTHETIC ZONE: ACHIEVING PROPER 3D POSITIONING WITH A DIGITAL WORKFLOW

The placement of dental implants to replace missing teeth has become standard in dental practice yet the esthetic zone still presents challenges. Proper 3D implant placement is crucial to success. An understanding of the role of soft and hard tissues in the long term outcome is crucial in the planning phase for an ideal prosthetic outcome. New techniques and technologies have now made it possible to routinely achieve this precise implant positioning. Use of planning software, 3D printing, surgical guides and proper component selection will be discussed in this course.

COURSE OBJECTIVES:

- Understand the importance of proper 3D Implant Positioning
- The importance of 3D position in relation to hard and soft tissue
- Outline digital work flow to achieve proper hard & soft tissue position
- Define what datasets are necessary for guided surgery to achieve proper implant position

DR. RICK FERGUSON has been involved in teaching implant dentistry for the last 20 years and has lectured nationally and internationally. These lecture topics have included treatment planning, case selection, simple and complex surgical placement and restoration, advanced bone grafting and bone graft materials, use of Computed Tomography and surgical guides, management of complications and failures. Dr. Ferguson has placed and restored over 6000 dental implants and maintains a private practice with his wife Dr. Katherine Ferguson in Davie, FL emphasizing dental implants and where they also teach a live surgery implant continuum. He has also been instrumental in developing digital techniques and bringing several 3D printers to dentistry.

ABOUT THIS PM COURSE:

AFFORDABLE 3D PRINTING FOR THE DENTAL PRACTICE

The fabrication of dental appliances in the dental practice is not as routine as it once was. Most appliances are currently sent to outside labs for fabrication due to the cost of materials, equipment and labor. 3D printing has the potential to change that significantly. Low cost 3D printers and materials are available now that promise to reduce lab costs and turnaround time for the dental practice. Indeed, there are appliances that cannot be fabricated cost effectively without 3D printing. This course will cover the various 3D printing techniques and how we can use them to fabricate several types of appliances commonly used in dentistry.

COURSE OBJECTIVES:

- Understand how 3D printing works
- Outline the appliances that can benefit from 3D printing fabrication
- Review the necessary material requirements for 3D printing dental appliances
- Discuss several low cost 3D printers that can be used in the dental practice

Seminar #3, Friday, January 18, 2019**Level: For Dentists & Hygiene Staff****Karen Baker - "Advances in Dental Pharmacotherapy: How to Maximize Success While Limiting Risk in Everyday Practice"****ABOUT THIS COURSE:**

The range of drug therapy options available to dental practitioners has greatly expanded over the past ten years. This expansion has opened the door to unprecedented therapeutic successes as well as disastrous drug misadventures. This course will update the dental team on recent developments in dental pharmacotherapy while providing strategies for prescribing to ensure therapeutic success. Drug therapy and alternative medicine reference sources will be listed and critiqued as to usefulness in daily practice. Clinically relevant information about effectiveness, adverse effects, patient specific drug selection criteria, dosing, and cost will be presented for therapeutic agents commonly used in dentistry. Systemic antibiotics, anxiolytics, analgesics and mucosal disease agents will be evaluated and discussed. Special attention will be given to certain controversial areas including antibiotic premedication of joint replacement patients and office management of dental anxiety. Potentially dangerous drug and supplement interactions important in clinical dentistry will be listed and reviewed with emphasis on avoidance and patient management strategies. Extensive and very current handouts will be provided to maximize the chairside value of this fast-paced and entertaining course.

COURSE OBJECTIVES:

- Buy and easily use the best drug and alternative medicine references for dental practice
- Choose the most cost effective antibiotic or anxiolytic for a specific patient
- Prescribe antibiotic premedication for certain patients with a variety of implants and conditions based on screening criteria and current evidence
- Prescribe innovative topical and systemic therapies for both inflammatory and infectious mucositis patients
- Choose an analgesic NSAID regimen based on relative adverse effects, drug interactions, efficacy for pain vs inflammation
- Enhance the analgesic effects of opiod analgesics while minimizing their adverse effects and abuse potential

KAREN BAKER has been on the Dental College faculty at the University of Iowa for 37 years and occupies a unique role in dental practice and education. She is a clinical pharmacist with a Master's degree in clinical pharmacology and therapeutics and is focused on patient-specific dental drug therapy. She has given well over 1000 invited programs nationally and internationally and holds memberships in many dental and clinical pharmacology and therapeutics organizations. Her dental education-based pharmacy and drug therapy consultation center is the only one in the United States. She has authored more than 50 articles and abstracts and lectures extensively in pre-doctoral and graduate courses at the University of Iowa.

Seminar #4, Friday, April 12, 2019**Level: For Entire Team****Dr. Mike Malone - "Minimal Preparation = Maximum Longevity"****ABOUT THIS COURSE:**

Dr. Mike Malone has combined the occlusion and restorative teachings of L D Pankey, Pete Dawson, John Kois, Frank Spear, etc., with a passion for learning from the best and brightest in cosmetic dentistry. He has developed systems for combining predictable restorative techniques with ideal cosmetic procedures. The course will cover smile design and ideal provisional fabrication and review preparation details for all-ceramic cosmetic restorations that will give life-like, strong, and long-lasting results.

COURSE OBJECTIVES:

- Complete the preparation phase faster and with more control
- Manage soft tissue and take ideal impressions every time
- Use principles of smile design to develop an ideal diagnostic waxup
- Transfer the information in the diagnostic waxup into a completed provisional that rivals the final restoration
- Complete and seat finished restorations with predictability
- Understand the principles of adhesion and how to select the ideal cement based on indication, prep design and type of restorative material with hands-on instruction on techniques using models with several all-ceramic restorations
- Learn step by step procedures for delivering all-ceramic restorations with confidence and success

DR. MIKE MALONE graduated with a Master's degree from Louisiana Tech University and received his dental degree from the LSU School of Dentistry in 1976. He then served three years in the Air Force Dental Corps before returning to Louisiana to establish a private general practice. Dr. Malone's commitment to excellence in restorative and cosmetic dentistry started early with extensive continuing education with his primary mentors: L. D. Pankey, Pete Dawson, Alvin Fillastre, and Mike Schuster. He received a fellowship in the Academy of General Dentistry in 1988 and is a member of the ADA, American Equilibration Society, the Pierre Fauchard Academy, and the Pankey Alumni Association. He has been a member of the American Academy of Cosmetic Dentistry since 1988, and was accredited in 1992. In 1995, Dr. Malone was asked to become a member of the Accreditation Board of Examiners of the American Academy of Cosmetic Dentistry, and went on to become an Appeals Examiner for the A.B.O.E. After serving six years on the Board of Directors of the AACD, Dr. Malone served as President for 2003-04. He is also on the staff of LSU as an Assistant Clinical Professor in Prosthodontics. He is a published author in leading journals, member of The Catapult Group and speaks internationally on cosmetic and restorative dentistry. Dr. Malone maintains a fulltime dental practice limited to cosmetic and reconstructive dentistry in Lafayette, LA.

Quick and Easy Registration online at www.mbds.org

Lunch at the Zoo

The Montgomery Bucks Dental Society is proud to invite you and your family to our second annual lunch at the Zoo even.

When: Sunday September 9th from 10:30 am to 1:30 PM

WHERE: Elmwood Zoo • 1661 Harding Blvd. • Norristown, PA 19401

General Admission Ticket: \$5.00 (includes lunch) Payable at Zoo entrance.

Children under 5 years old are free!

This event is specially created for dentists and their children

RSVP: mbdsevents@gmail.com by August 30th

Presents

Robert C. Vogel, D.D.S.

**State of the Art Topics and Techniques
in Implant Prosthetics For Private Practice**

This program is designed for the entire implant team stressing ideal interaction for simplification of even the most advanced Implant cases. Topics in fixed, removable and hybrid prosthetics will be addressed focusing on new options for screw retained restorations, ideal restorative material selection and fabricating provisional restorations. Simplified overdentures and implant retained partial dentures including fool-proof fee determination and patient presentation techniques will be discussed. Also included is an in-depth discussion of the newest components & technologies to gain confidence with abutment selection and incorporating the benefits of CAD CAM and zirconium restorative materials.

When: Friday, October 5, 2018

Where: The Buck Hotel, Feasterville, PA

Anterior Implant Esthetics and Complications

Continued from Page 1

Since 2007, Dr. Kubikian has taught a comprehensive implant course accredited by the New Jersey Dental Association which is geared to provide state of the art implant education to the dental community. In 2008, Dr. Kubikian founded the South Jersey Dental Study Club which meets monthly and provides continuing education lectures to the dental community from prominent national and international lecturers. Dr. Kubikian maintains a private Periodontic and Implant Dentistry practice in Sewell, NJ as well as being on the faculty at the University of Pennsylvania.

Outside of dentistry, Dr. Kubikian spends time with his wife and three daughters. He is an avid sports fan and enjoys baseball, basketball and football.

ATTENTION!

The PDA needs your email address

If you are not receiving email updates and notifications from the PDA, please take two minutes to submit your current email address to the Pennsylvania Dental Association through the website: www.padental.org. The PDA sends important information to the membership through email. If you do not have your email address registered with the PDA you will not receive these communications and other updates important to your practice and you as a member.

The entire PDA membership is invited to vote for officer and delegate candidates for both the PDA and the ADA through email. Please register your email so you can take part and support these members who give countless hours of their time to monitor and effect change in your profession. Your vote is important to those who are willing to guide your organization and represent you at all levels of the tripartite.

President's Message

Continued from Page 1

In response to our membership asking for information concerning running a successful dental business, financial and insurance planning, human resources, and practice management, we are developing a lecture series comprised of experts in their respective fields to address those issues. Stay tuned for details.

Your continued support of these programs is what helps make our society vibrant, growing, and the most active dental society in Pennsylvania. If you have not attended an event in some time, I invite you to come and join your friends and colleagues. We have something for everyone.

By the way, if you answered Quintilis (July for Julius) and Sextilis (August for Augustus), you were right. You win a 1000 bonus points. *I look forward to seeing you at one or more of our programs.*

Yours in service,

David M. Kaffey, DDS

Handouts & Wi-Fi for CE Courses

Any relevant handouts for the MBDS continuing education series lectures will be posted on the MBDS Continuing Education webpage shortly before each session.

If attending a course, please check the webpage:
<http://www.mbds.org/Education.html>
and print out the handout pages.

There is also Wi-Fi available on-site so you could also bring a device and view them during the presentation if you desire.

Montgomery Bucks Dental Society
Meeting Minutes are posted and
available on our website:
www.mbds.org
from the home page
using the "For Dentists" tab
on the left and then
the "Meeting Minutes" tab
and clicking on the button there.

Dinner Meeting: Monday, Sept. 24, 2016
Dr. Daniel Kubikian

Our mission is to encourage the improvement of the health of the public, foster excellence and ethics in dentistry, to provide a network of informed, proactive dentists, to enhance the image of the profession to the public, to provide education and services to the members, to support the growth and professional success of the members, and to represent the interest of the dental profession and the public which it serves.

Membership Benefits in the Montgomery-Bucks Dental Society include:

General Membership Meetings

- Meet with your colleagues at these monthly dinner meetings offering lectures by a variety of speakers.
- Members receive two complimentary dinners annually.

Continuing Education Programs

- Fulfill All CE Credit Requirements
- Grow professionally by attending our superb CE programs featuring nationally known speakers. New dentists receive substantial discounts for all courses; nonmembers are invited to attend one evening program or one all-day seminar free of charge.
- Accumulate the required CE credits in one year through various programs and meetings offered by MBDS while enjoying the camaraderie of your colleagues who represent a diversified membership.

Valley Forge Dental Conference

- Experience a top-rated dental meeting featuring a three-day scientific session as well as a full range of technical exhibits. Enjoy nationally known speakers, auxiliary programs and exciting social activities.
