**Monday, February 25, 2019**

**Normandy Farms**

**Blue Bell, PA**

**Julián Conejo, DDS, M.Sc.**

*Presents*

***Optimized Bonding and Material  
Selection for Implant Restorations  
with Chairside CAD/CAM Technology.***

Bonding optimization and proper material selection are crucial for the long term success of implant supported restorations. Scientific studies and step by step clinical protocols will be described in this lecture with the objective of improving success rates for single and multiple-unit CAD/CAM restorations.

Julián obtained his DDS from the Universidad Latina, Costa Rica in 2005, and then completed training as a prosthodontist at Universidad Intercontinental, Mexico in 2008. He worked as a Professor at the Prosthodontics Department, Universidad Latina and actually works as Clinical CAD/CAM Director at the Department of Preventive and Restorative Sciences, University of Pennsylvania, Philadelphia USA.

**Cocktails - 6 PM • Dinner - 7 PM**

**Meeting - 8 PM**

***See page 15 for Registration form.***

## **President's Message**

*I would like to wish all of you a very  
Happy Thanksgiving!*

This is the time of the year when we think and reflect on all the wonderful things in our lives that we are thankful for. I am thankful for my beautiful, healthy family. I am thankful for my caring, concerned, and very hard working office team. And I am thankful for the opportunity to serve as your President.

*David M. Kaffey, DDS*

For the past 91 years, our dental society has continuously sought to be on the forefront of our profession. From being an early adopter of promoting good oral hygiene habits in the 1950's, promoting smoking cessation in the 1970's, and providing the latest information on today's clinical procedures, the Montgomery Bucks Dental Society has always, and always will be, the lead organization for our profession.

Your leadership has recognized that there is a significant need within our profession for information on how to run a dental business. Whether you are a graduating dental student or resident looking for a practice to join, an associate interested in buying a practice, a mid-career dentist who has made some less than stellar financial decisions or a seasoned practitioner in the latter stages of your career, there is a need for information on how to run our businesses and how to plan our personal and professional finances. The fact is that you may want or have the latest dental technology, have achieved the highest certificates within your field, and know what is best for your patients, but, if you are in private practice, regardless of what business model, and you don't understand the difference between a P&L, FICA, IRA, qualified plans, 529 plans, accrued time, trustee, leasehold loans, how much disability insurance to have and a healthcare directive, it will be difficult for you to achieve your goals.

With that in mind, we will be launching the **Montgomery Buck Dental Society Business Success Symposium** in 2019. This symposium will consist of presentations on critical business topics including Finances, Financial Planning and Insurance, Accounting,

**Deadline for January 2019 Issue: December 1, 2018**

The Bulletin (ISSN 0027-0156) will be published six times for the 2018-2019 Year in September, October, November, January, February, and April. The Montgomery-Bucks Dental Society and the editorial staff assume no responsibility for articles or opinions expressed in this publication by its contributors, or for omissions from such articles. All articles must reach the editor by the first of the month previous to next issue's publication.

Advertising rates are available from the Business Manager, Dr. Thomas A. Howley, P.O. Box 633, Green Lane, PA 18054. 215-234-4203. [mbsdsr@comcast.net](mailto:mbsdsr@comcast.net)

On Sunday, September 9th, the Montgomery Bucks Dental Society was proud to organize our second

## Lunch at the Zoo

58 people responded to our invitation but due to weather conditions only 30 were able to attend. The event was held at the Elmwood Zoo and lunch was provided.

Dr David Kaffey, President of the MBDS, was there and he spoke to the attendants about organized dentistry and the advantages of being a member of the MBDS and the PDA. We encouraged the non members to join us and we also reminded them to visit our website and check for future CE events.

*Ada Greenfield DMD*

# Financial Planning Information

## Financial Aid for College

### What About Financial Aid for College?

Financial aid for college consists of loans, grants, scholarships, and work study. Grants and scholarships are worth searching for because they don't have to be paid back, unlike student loans, which require an ongoing financial obligation, or work study, which requires a work commitment. There are generally three sources for college grant aid; the federal government, state higher-education agencies, and colleges.

In order to be considered for any type of grant aid, you or your child should file the federal government's financial aid application, the FAFSA. In addition, private colleges typically require the CSS Profile form or their own individual aid form. The FAFSA and CSS Profile can be filled out and submitted on line (the FAFSA is free but the CSS Profile has a fee). These forms do require some time to complete, but the time spent is worth it. Not only are these forms a prerequisite to various types of grant aid, but some colleges may require them in order for students to be eligible for college merit scholarships. Keep in mind that students must reapply for financial aid every year.

### U.S. GOVERNMENT GRANTS

There are two main federal grants for college; Pell Grants and Federal Supplemental Educational Opportunity Grants (FSEOGs). Both are based on financial need. The Pell Grant

program is Uncle Sam's largest financial aid grant program. Pell Grants are available to undergraduate students with exceptional financial need, and are the foundation of every undergraduate student's financial aid package (for those who qualify). Graduate students are not eligible. Pell Grants are administered by the federal government and awarded on the basis of college costs and a financial need. Financial need is based on factors such as family income and assets, family size, and the number of college students in the family. For the 2017-2018 award year, the maximum Pell Grant is \$5,920.'

The FSEOG is the federal government's second-largest program. An FSEOG is available to undergraduate students who demonstrate the greatest financial need. (i.e., those students with the lowest expected family contributions). Priority is given to Pell Grant recipients. The FSEOG is a campus-based program, which means that the financial aid office at each college administers it. Every college receives a certain amount of FSEOG funding from the federal government each year, and when the funds are awarded, there are no more until the following year. So even though a student might be eligible for an FSEOG based on his or her financial need, the funds may have already been expended for that year. The maximum FSEOG award is \$4,000 per academic year, and awards can range from \$100 to \$4,000.

### STATE GRANTS

Many states offer grant programs as well. Each state's grant program is different, many give special preference to state residents planning to attend an in-state school. For more information, contact your state's higher-education agency.

### COLLEGE GRANTS

**Finally, many colleges offer specialized grant programs. This is particularly true of older schools with many alumni and large endowments.** These grants are usually based on financial need or scholastic ability. Consult your college financial aid office for more details. Source: 1) U.S. Department of Education, 2017

## Continuing Education 2018-2019 - See Page 14 for registration.

### Seminar #2, Friday, November 16, 2018

Dr. Rick Ferguson - AM: "Implants in the Esthetic Zone" PM: "Affordable 3D Printing"

Level: For Entire Team/New Dentists

#### ABOUT THIS AM COURSE:

#### IMPLANTS IN THE ESTHETIC ZONE: ACHIEVING PROPER 3D POSITIONING WITH A DIGITAL WORKFLOW

The placement of dental implants to replace missing teeth has become standard in dental practice yet the esthetic zone still presents challenges. Proper 3D implant placement is crucial to success. An understanding of the role of soft and hard tissues in the long term outcome is crucial in the planning phase for an ideal prosthetic outcome. New techniques and technologies have now made it possible to routinely achieve this precise implant positioning. Use of planning software, 3D printing, surgical guides and proper component selection will be discussed in this course.

#### COURSE OBJECTIVES:

- Understand the importance of proper 3D Implant Positioning
- The importance of 3D position in relation to hard and soft tissue
- Outline digital work flow to achieve proper hard & soft tissue position
- Define what datasets are necessary for guided surgery to achieve proper implant position

**DR. RICK FERGUSON** has been involved in teaching implant dentistry for the last 20 years and has lectured nationally and internationally. These lecture topics have included treatment planning, case selection, simple and complex surgical placement and restoration, advanced bone grafting and bone graft materials, use of Computed Tomography and surgical guides, management of complications and failures. Dr. Ferguson has placed and restored over 6000 dental implants and maintains a private practice with his wife Dr. Katherine Ferguson in Davie, FL emphasizing dental implants and where they also teach a live surgery implant continuum. He has also been instrumental in developing digital techniques and bringing several 3D printers to dentistry.

#### ABOUT THIS PM COURSE:

#### AFFORDABLE 3D PRINTING FOR THE DENTAL PRACTICE

The fabrication of dental appliances in the dental practice is not as routine as it once was. Most appliances are currently sent to outside labs for fabrication due to the cost of materials, equipment and labor. 3D printing has the potential to change that significantly. Low cost 3D printers and materials are available now that promise to reduce lab costs and turnaround time for the dental practice. Indeed, there are appliances that cannot be fabricated cost effectively without 3D printing. This course will cover the various 3D printing techniques and how we can use them to fabricate several types of appliances commonly used in dentistry.

#### COURSE OBJECTIVES:

- Understand how 3D printing works
- Outline the appliances that can benefit from 3D printing fabrication
- Review the necessary material requirements for 3D printing dental appliances
- Discuss several low cost 3D printers that can be used in the dental practice

**HEALTHLINK**  
needs  
volunteers!

## Are you willing to help?

**HEALTHLINK** is a free dental clinic serving uninsured, low-wage earning adults in Bucks & Montgomery Counties. The Clinic provide services to working individuals who make below minimum wage and veterans. Free on-site oral health services include: oral exams, x-rays, fillings, dental hygiene, extractions, root canals, crowns, and patient education.

If you are interested in helping, please contact the clinic director, Bela Amado at [bamado@healthlinkdental.org](mailto:bamado@healthlinkdental.org)

**Seminar #3, Friday, January 18, 2019****Level: For Dentists & Hygiene Staff****Karen Baker - "Advances in Dental Pharmacotherapy: How to Maximize Success While Limiting Risk in Everyday Practice"****ABOUT THIS COURSE:**

The range of drug therapy options available to dental practitioners has greatly expanded over the past ten years. This expansion has opened the door to unprecedented therapeutic successes as well as disastrous drug misadventures. This course will update the dental team on recent developments in dental pharmacotherapy while providing strategies for prescribing to ensure therapeutic success. Drug therapy and alternative medicine reference sources will be listed and critiqued as to usefulness in daily practice. Clinically relevant information about effectiveness, adverse effects, patient specific drug selection criteria, dosing, and cost will be presented for therapeutic agents commonly used in dentistry. Systemic antibiotics, anxiolytics, analgesics and mucosal disease agents will be evaluated and discussed. Special attention will be given to certain controversial areas including antibiotic premedication of joint replacement patients and office management of dental anxiety. Potentially dangerous drug and supplement interactions important in clinical dentistry will be listed and reviewed with emphasis on avoidance and patient management strategies. Extensive and very current handouts will be provided to maximize the chairside value of this fast-paced and entertaining course.

**COURSE OBJECTIVES:**

- Buy and easily use the best drug and alternative medicine references for dental practice
- Choose the most cost effective antibiotic or anxiolytic for a specific patient
- Prescribe antibiotic premedication for certain patients with a variety of implants and conditions based on screening criteria and current evidence
- Prescribe innovative topical and systemic therapies for both inflammatory and infectious mucositis patients
- Choose an analgesic NSAID regimen based on relative adverse effects, drug interactions, efficacy for pain vs inflammation
- Enhance the analgesic effects of opiod analgesics while minimizing their adverse effects and abuse potential

**KAREN BAKER** has been on the Dental College faculty at the University of Iowa for 37 years and occupies a unique role in dental practice and education. She is a clinical pharmacist with a Master's degree in clinical pharmacology and therapeutics and is focused on patient-specific dental drug therapy. She has given well over 1000 invited programs nationally and internationally and holds memberships in many dental and clinical pharmacology and therapeutics organizations. Her dental education-based pharmacy and drug therapy consultation center is the only one in the United States. She has authored more than 50 articles and abstracts and lectures extensively in pre-doctoral and graduate courses at the University of Iowa.

**Seminar #4, Friday, April 12, 2019****Level: For Entire Team****Dr. Mike Malone - "Minimal Preparation = Maximum Longevity"****ABOUT THIS COURSE:**

Dr. Mike Malone has combined the occlusion and restorative teachings of L D Pankey, Pete Dawson, John Kois, Frank Spear, etc., with a passion for learning from the best and brightest in cosmetic dentistry. He has developed systems for combining predictable restorative techniques with ideal cosmetic procedures. The course will cover smile design and ideal provisional fabrication and review preparation details for all-ceramic cosmetic restorations that will give life-like, strong, and long-lasting results.

**COURSE OBJECTIVES:**

- Complete the preparation phase faster and with more control
- Manage soft tissue and take ideal impressions every time
- Use principles of smile design to develop an ideal diagnostic waxup
- Transfer the information in the diagnostic waxup into a completed provisional that rivals the final restoration
- Complete and seat finished restorations with predictability
- Understand the principles of adhesion and how to select the ideal cement based on indication, prep design and type of restorative material with hands-on instruction on techniques using models with several all-ceramic restorations
- Learn step by step procedures for delivering all-ceramic restorations with confidence and success

**DR. MIKE MALONE** graduated with a Master's degree from Louisiana Tech University and received his dental degree from the LSU School of Dentistry in 1976. He then served three years in the Air Force Dental Corps before returning to Louisiana to establish a private general practice. Dr. Malone's commitment to excellence in restorative and cosmetic dentistry started early with extensive continuing education with his primary mentors: L. D. Pankey, Pete Dawson, Alvin Fillastre, and Mike Schuster. He received a fellowship in the Academy of General Dentistry in 1988 and is a member of the ADA, American Equilibration Society, the Pierre Fauchard Academy, and the Pankey Alumni Association. He has been a member of the American Academy of Cosmetic Dentistry since 1988, and was accredited in 1992. In 1995, Dr. Malone was asked to become a member of the Accreditation Board of Examiners of the American Academy of Cosmetic Dentistry, and went on to become an Appeals Examiner for the A.B.O.E. After serving six years on the Board of Directors of the AACD, Dr. Malone served as President for 2003-04. He is also on the staff of LSU as an Assistant Clinical Professor in Prosthodontics. He is a published author in leading journals, member of The Catapult Group and speaks internationally on cosmetic and restorative dentistry. Dr. Malone maintains a fulltime dental practice limited to cosmetic and reconstructive dentistry in Lafayette, LA.

# ADA NEWS

***Penn dental school receives \$1 million grant for students pursuing community-based dentistry***

Penn dental school receives \$1 million grant for students pursuing community-based dentistry

September 24, 2018

Philadelphia — The University of Pennsylvania School of Dental Medicine announced Sept. 20 that it received a \$1 million scholarship grant from Delta Dental Community Care Foundation to help financially support students pursuing a career in community-based dentistry.

Delta Dental's Oral Health Education grant will award two \$25,000 scholarships each year to dental students who desire to work in an underserved area after graduation and who have demonstrated a commitment to community outreach during their students. The first application cycle will open this fall for interested candidates in the current third-year class, according to the announcement.

"What's exciting about this scholarship is that it will provide the support that some students need to ultimately pursue this path after graduation," said Dr. Joan Gluch, division chief of community oral health, and co-director of the grant. "The need is great because approximately 48 million people in the United States live in areas with dentist shortages."

The scholarships from the philanthropic branch of Delta Dental of Pennsylvania are intended to lighten the overall expenses and debt during the recipient's fourth-year of study.

"The availability of scholarships to offset loans can be a deciding factor for students who may have considerable undergraduate debt, or who come from a financially challenged background," said Dr. Olivia Sheridan, co-director of the grant and assistant dean for admissions, in a news release.

Over time, Penn Dental Medicine announced that the grant funding can also contribute valuable data to community health needs assessment and further expands a relationship between Delta Dental Community Care Foundation and the dental school.

In 2017, the foundation awarded Penn Dental Medicine a \$650,000 grant to expand PennSmiles, the school's oral health education and clinical care program for schoolchildren and their families in Philadelphia.

## ATTENTION!

### The PDA needs your email address

If you are not receiving email updates and notifications from the PDA, please take two minutes to submit your current email address to the Pennsylvania Dental Association through the website: [www.padental.org](http://www.padental.org). The PDA sends important information to the membership through email. If you do not have your email address registered with the PDA you will not receive these communications and other updates important to your practice and you as a member.

The entire PDA membership is invited to vote for officer and delegate candidates for both the PDA and the ADA through email. Please register your email so you can take part and support these members who give countless hours of their time to monitor and effect change in your profession. Your vote is important to those who are willing to guide your organization and represent you at all levels of the tripartite.

## President's Message

*Continued from Page 1*

Legal, Human Resources, and Practice Management. This series of presentations will be spread out over several months, with one topic being covered at a time. We have assembled an outstanding team of experts who will provide you with easy to understand, practical business and personal information in an intimate setting that encourages interaction and the exchange of ideas. Keep an eye on your inbox and mail for details and registration information.

Our profession and life has its challenges. By understanding and being prepared for those challenges, we are in a better position to be successful. I hope you will join me and register for this important series. It may very well change the course of your life.

*By Failing to Prepare, you are Preparing to Fail* – Benjamin Franklin

Yours in service,

*David M. Kaffey, DDS*

### Handouts & Wi-Fi for CE Courses

Any relevant handouts for the MBDS continuing education series lectures will be posted on the MBDS Continuing Education webpage shortly before each session.

If attending a course, please check the webpage:  
**<http://www.mbds.org/Education.html>**  
and print out the handout pages.

There is also Wi-Fi available on-site so you could also bring a device and view them during the presentation if you desire.

Montgomery Bucks Dental Society  
Meeting Minutes are posted and  
available on our website:  
**[www.mbds.org](http://www.mbds.org)**  
from the home page  
using the "For Dentists" tab  
on the left and then  
the "Meeting Minutes" tab  
and clicking on the button there.

**Dinner Meeting: Monday, February 25, 2019**  
**Julián Conejo, DDS, M.Sc.**

*Our mission is to encourage the improvement of the health of the public, foster excellence and ethics in dentistry, to provide a network of informed, proactive dentists, to enhance the image of the profession to the public, to provide education and services to the members, to support the growth and professional success of the members, and to represent the interest of the dental profession and the public which it serves.*

### **Membership Benefits in the Montgomery-Bucks Dental Society include:**

#### **General Membership Meetings**

- Meet with your colleagues at these monthly dinner meetings offering lectures by a variety of speakers.
- Members receive two complimentary dinners annually.

#### **Continuing Education Programs**

- Fulfill All CE Credit Requirements
- Grow professionally by attending our superb CE programs featuring nationally known speakers. New dentists receive substantial discounts for all courses; nonmembers are invited to attend one evening program or one all-day seminar free of charge.
- Accumulate the required CE credits in one year through various programs and meetings offered by MBDS while enjoying the camaraderie of your colleagues who represent a diversified membership.

#### **Valley Forge Dental Conference**

- Experience a top-rated dental meeting featuring a three-day scientific session as well as a full range of technical exhibits. Enjoy nationally known speakers, auxiliary programs and exciting social activities.
